PREFACE

THE coins to be found in this collection have been acquired over a number of years from many different sources. The tickets originally with the coins name almost all the world's leading dealers and auction rooms. Many of the coins were purchased from collections sent in for sale at Messrs. Glendinings and catalogued by the present cataloguer. It is always a pleasure to handle such fine coins and to know that other collectors will have an opportunity of adding to their special series.

To review all the rarer coins is unnecessary—a glance at the plates will readily show that here is a collection to be studied.

The German series is one of the most extensive to be offered in recent years, and the silver coins of this series, together with the other European silver coins, will be offered in an October auction sale.

It is hoped that the American and Asian portion of the collection will be ready at the end of this year or early next year.

PRICED CATALOGUES

Coins

AFTER each sale these catalogues are issued with the prices realised printed in the margin opposite each lot, thus giving at a glance a reliable guide to values.

The final test of value must always be auction prices rather than the figures given in books of reference for changing times and fashions soon render the latter obsolete and misleading.

On the average we issue twelve Coin catalogues a year, some of which are usually of sales of important collections. The **priced catalogues** are posted to subscribers as soon as ready. usually about three weeks after the date of sale and the subscription is . . . .
